LETTER BOOK

No. 10

A. LOUDON SNOWDEN.

Supt

FROM FEBRUARY 23rd 1881

TO JUNE 3rd 1881.

—MANN'S—
PARCHMENT COPYING PAPER.

This Parchment Paper is **MUCH STRONGER** and shows a **CLEARER COPY,** than any other ever made for the purpose. The ink is **LESS LIABLE TO SPREAD,** and can be written upon with a pen.

DIRECTIONS FOR COPYING.

Place a piece of blotting-board under the leaf of Copying Paper; then with brush, wet the leaf. Rub in the surplus water with the hand: then place the written letter on the leaf, (leaving the blotting-paper under the leaf, to take up any excess of water that may yet remain,) place it in the press, and in 10 or 15 seconds a perfect copy will be secured.

☞The leaves WILL DRY AS SMOOTH AS SILK by placing the book in the Press after Copying.

☞Place the oil sheets between the copies just made, to prevent blending or setting off.

Another way when many letters are copied.

Procure a tin box with lid to hold 20 blotting pads.

Dip half the lot of blotters in water, let them drain off a few moments; then place a dry blotter between each wet one, give them a few minutes squeeze in Press and they will remain wet for three days; then take an oil sheet, place it to the left; then lay a wet blotter; then turn leaf of Copying over on blotter; then lay your letter on; then another oil sheet, and so on, and you can copy all your letters at one time, thereby saving time. With a little care and experience as to wetting at first, you will be so well pleased, as never to go back to old way.

BOXES FURNISHED IF DESIRED, AT SMALL COST.

23rd February, 1

Sir

In reply to yours of the 18th. inst. in reference to the registration of Dec 31st. 1850 for £ 20 metal circulars &c, I beg to say that I have looked over the circular and very much approve of the change from American to National. How the former could have been used, I am at a loss to understand.

I also approve of your suggestion to make the approval of the Directs at the foot of the circular, and can see no reason why the names of the Directors and Superintendent

should not be printed with the circular. I suggest that the heavy line in inquiries, orders, &c be placed at the foot of the circular above the approval of the Director. I think it would be well to leave that line in.

I have added something in relation to the price of the proof sets exclusive of the Trade Dollar, and made some slight variation in regard to the coins on hand.

On the line of medals, I have taken the liberty of writing my uncle's name in full, and adding to the list the medal of Robert M.

Patterson, Director.

I also suggest the propriety of reducing the price of certain small medals from $1.12, to $1.00 and from 30 cts. to 25 cts. These latter are only the size of a dime and the price charged, is in my judgment too great.

I submit the form, and hope that it will meet your approval and beg to remain

Very respectfully
Your obedient Servant

Sir;

Your letter of 21st inst. enclosing a defective $20.00 gold piece has been duly received and in reply, I would say that your orders will be strictly carried out, if you so desire, but ~~that~~ it would be more convenient, perhaps, to exchange the fractured piece for a new one, than to take it up in the accounts of both offices

23rd February 1

Sir;

In compliance with your request I have the honor to submit herewith the conclusions arrived at in relations to the different articles bid for under the published proposals, to wit:-

Steam Coal

All the bids for steam generating Coal are rejected as the price named by the lowest bidder is believed to be above what the average price will be within the period named.

Coal for Melting.

The bid of William Jordan for hand picked and specially prepared Council Ridge Coal at $5.90 per ton, is accepted.

Charcoal

The bid of John R Rowland to furnish it at 14¢, is believed to be a fair rate and is accepted.

Wood.

All the bids for 6 months supply have been rejected as above the market rate, and the bid of T. D. Watson

to supply the Mint for one year from the 1st January at the rate of $9.50 per Cord, is accepted, as being entirely in the interest of the Government. The lowest bid for the 6 months supply — $10.95, is $1.45 per Cord more than the price named for the years supply, which would be about $750.00 more on the amount used within the period named than under the bid which is accepted

Acids.

The only bid for acid, that of Farrage & Stoelle is rejected. Letters were written to the leading firms

soliciting bids for Aqua Fortis,
and Oil of Vitriol. Under these proposals
the firm of Harrison Brothers & Co were the
lowest bidders, and the contract
is given to them.

There is still due the Mint
on a former contract 7,134 pounds
of Nitric Acid and 2825 pounds
of Muriatic Acid.

In the present proposals I
have not indicated any specific
amount to be supplied, but, as
much as may be required for
our use within the period named

This will avoid repetition of the embarrassment resulting from a former bid when the amount which would be profitably used was given and which turned out to be largely in excess of our needs. This was the mode pursued by a former Superintendent and was followed by me

Mint of the United States at Philadelphia, Pa.
PERINTENDENT'S OFFICE

Lumber

The only bidder is the firm at present supplying the Mint. Under his bid lumber will be purchased from time to time as it may be required.

Fire Brick & Clay

The award will be made to Mess Borgner & O'Brien. As the quantity is very small, no bond will be taken, indeed I could not get a bond under the circumstances from the firm although I have no doubt they will carry out their agreement.

Crucibles &c

As the Melter and Refiner insists that but one firm supplies the articles under this head suited for our purpose, I have rejected all the bids and will purchase as may be required from time to time

Copper & Brass

All the bids are rejected as not in the interest of the Government to accept.

Spelter

All bids rejected, as the price

for the brand used in the Mark is above the price for which it can be purchased from the agent of the Company manufacturing the same

Soda - ash

The bid of The McKeone Soap Manufacturing Co. is accepted.

Plumbers Materials

All bids rejected as above the Market price

Dry Goods

The bid of Granville Haines & C

is the only bid, and shall be accepted at the lowest market rates.

Iron & Steel

All bids rejected as the quality of the steel and irons precludes the acceptance of any of the bids submitted

Hardware

The bid of James M. Vance Co is accepted

Paints

There was but one bid under the head of Paints

for oils from a party who are a mere dealer in the article. I think it preferable for us to purchase these articles through leading reliable houses through whom we have been supplied for some years

Leather Belting, Belt-lacing, Emery cloth, Rubber Mitts & Gloves

The bid of D. P. Dieterich is accepted for all these supplies as the lowest and best

Borax

The bid of Savage & Hovell of 33 cts. per lb. is accepted, as it is the only bid for this & is very low if they supply the genuine article

Lard

The bid for this is awarded to the McKeone Manufacturing Co. as the lowest for the article required.

Lard Cylinder Oil

Awarded to McKeone & Son Manufacturing Co.

Mx. Farm Oil

All bids for Mx. Farm oil, rejected, as not for the article required.

Cosmic Oil

Bid rejected as above the market price.

"

Tallow

Awarded to McKeone & Son Manufacturing Co.

Castile Soap, Ballet Soap, Detersive Soap, Borax Soap (4) and Soap

Awarded to McKeone & Son Manufacturing Co.

In all cases where rejection of bids has been made, it has been because the article named is not what is desired in the bid, or that the price is in excess of the market rate

My action in this matter is submitted for your approval

Very respectfully

My Dear Sir,

I reluctantly gave consent to the Engraver to frost the last assay medals. My impression as to the impropriety of this process has been fully indicated by the appearance of the medals since the assay. They already show discoloration.

If you will have those presented to the gentlemen of your office, and your own forwarded here by Express, directed to me personally, I will have them restruck and send back, without any expense

Respectfully referring to your letter of yesterday approving "Proposals for Supplies" page 5. 6th & 7th lines from the top, you have attached the price of "Gum Cloth" to "Pure Gum Rings" & omitted the title "Gum Cloth" and also the price of "Gum Rings". Correctly stated, the two items would read as follows, viz:

Pure gum rings, assorted sizes.
Para, for office use. $1.- per doz, net.
" Engine " $1.50 " lb. "
Gum cloth, according to width, from 70¢ to $2.50 per yard, net.

Sir:

In reply to your letter of 8th inst informing me of a deficiency of 6.22 oz. in the invoice of silver bars sent in payment of Transfer Order 9934. I have to say that the bars were weighed carefully twice before being catalogued and that the weight, including a small bar of 7.47 oz. exceeded the invoice weight by about 4 oz. It was thought that this excess would cover the evaporation produced by the difference of temperature and hygrometric condition of the atmosphere

between Philadelphia and New Orleans, at this season. Such however proves not to be the case, and as there are no facilities, at any of the Mints for drying out the water contained in the bars of fine silver, which from bad casting are always more or less spongy, there is no course left but to put the discrepancy down as loss by evaporation

Sir.

I beg to acknowledge the receipt of your letter of yesterday, enclosing Bullion receipts Nos. 178, 188, 10. 47. 850 belonging to my Bullion a/c. for the 1st quarter, 1880, and requesting that the Endorsements thereon be so amended as to bear the Signature of Mr. J. C. Orton, Cashier (2nd Nat. Bank Newark, N.J. to whose order they are drawn) instead of that of Mr. John H. Kase, the President who had signed them. Similar endorsements having been accepted heretofore, it was not supposed that any objection would be made to these, and

as the Signature of Mr. Orton could not readily be obtained, they, having passed by endorsements through several hands before reaching the Mint, were accepted. I have forwarded them to day to the aforesaid Banks for the endorsement you desire, and when received, I will return them to you. There are doubtless others of the same character in the Department, yet to be passed upon, which I should be glad if you could accept, and in future can will used to reject such when presented.

In regard to the item of 11th

Mint of the United States at Philadelphia, Pa.

SUPERINTENDENT'S OFFICE

for which an explanation is asked, I would say that $21.460.18 is correct, but the rate should be @ $1.142 per oz. fine, the deposit clerk having erroneously entered it upon the abstract sheets $1.141 per oz. fine.

The shipment of $500 - Febry 4. 1880 was made to Minneapolis, Kansas, not Minnesota, as appears to be charged upon the bill in your Office. The distance, 1467 miles is correct.

Due reclamation will be made upon the Express Co. for the sum $27.45 disallowed as overcharges on transportation of Std. Silver Dollars, under former regulation.

Sir:

I have the honor to enclose oaths of office of Henry Barry and George B. Bunn, recently appointed, respectively Carpenter and Laborer in the Penal Department of this Mint.

I observe that the name of Mr Bunn is not George as formerly given to me, but George B. Bunn. Will you have the kindness to make the proper correction in the rolls of your office.

Mr Bunn is now serving on a jury and will not be able to report for

duty until April 1st prox.

Sir;

I have the honor to request instructions about the course you desire me to pursue in regard to the future orders for 5 ₵ coins which may be received at this Mint. The Redemption Fund will be closed on or before the end of this month, and the orders now on hand will exhaust the remaining supply of that Coin.

As no new 5 ₵ pieces are being Coined, I am at a loss to know how to fill the orders, or to whom to send the drafts which usually call for the

different denominations of Mint
Coins, in various proportions.

Sir:

In regard to the incongruities in the Statement of Gold and Silver of domestic production deposited at this Mint during Jan. 1881, I have the honor to report:

That after consultation with the Weigh Clerk and the Assayer, I have found that the lines of the blanks furnished to this office for the Statement in question have been filled as regards the items mentioned in your letter, viz:

Gold parted from Silver
Silver parted from gold
with the total results of the parting

D

proceeds upon bullion from whatever source it may have been derived. This has been done because there seemed to be in either blank no other headings under which they could be entered.

We have no evidence when a certain remittance of rather base gold has been received from a jeweller or pawnbroker, that the metal has been derived from our own territory, nor that it is a recent educt from the soil, but under the instructions from your office, as interpreted here, the blanks have been filled, as perfectly as possible, with the

items of information desired. Therefore under the items above specified the Weigh Clerk has entered the whole of the respectively parked gold and silver, whether derived from the soil or received in a manufactured form.

The proportion of gold in manufactured articles of jewelry, is naturally as small in this country as the purchasers will tolerate, and there is no such protection afforded to the buyer, as in some foreign countries where the fineness of the metal is assured by a Government Stamp. It may therefore easily happen that the amount

of jewellers refuse received during one month, the average may be below 500 fine, but it is an incorrect inference, though quite warranted by the form of the blank which we are required to fill, that this gold is of domestic production.

I may therefore say that your promise that "the gold and silver partings from jewellers' bars plate &c have been included in the items 'parted from gold and parted from silver'", is entirely correct, and I would respectfully ask for such further instruction in the use of the blanks, as may

4

be necessary to prevent similar discrepancies in the future.

In reply to your letter of the 7th. inst. in relation to the Indian Peace Medals I beg to say, that I have already secured photographs of the President and have in course of preparation, nearly completed, so far as the medal is concerned, a most admirable likeness. I shall perhaps, if not fully satisfied, send Mr. Barber to Washington to have a personal look at the President.

The reverse of the last medal is, in my judgment, the best that we could have for the purpose.

Sir.

I have the honor to enclose an application from the 1st National Bank Pittston Pa. for the exchange of certain 2 cent and 3 cent mino coins into 5 cent pieces, and to ask for instructions to guide my actions in the future.

By the Circular of 24th Feby 1881 (Dept. No 18) this Mint is made the office of Exchange and the power of Redemption abrogated.

By the Circular of March 28th 1881, the Coinage of 5 cent pieces, is suspended.

There is consequently no supply

See page 271

I will therefore be greatly obliged if you will indicate the manner in which the desires of the correspondent may be met, with conformity to the orders which have issued from the department

After you have decided upon the proper course to be adopted, you will further oblige me by returning the enclosure for filing in this office

of 3 cent pieces in my possession to fill orders for that denomination.

Under these circumstances supposing that a remittance of lawful coin (2 cent and 3 cent pieces) should be treated with the same deference as a bank cheque, or a remittance of silver gold or paper money, I sent the letter of the applicant to the United States Assistant Treasurer in this City with the remittance.

As you will see by the endorsement, that officer has this day returned the application and the remittance to me

April 14th 1

Sir.

I desire to respectfully call your attention to the condition of the fund in hand for the support of this Institution for the remainder of the current fiscal year, and to request that such action may be taken as seems from the presentation of facts, to be necessary.

The Appropriations for the current year are,

For Wages of Workmen,	$275,000.-	Inc.	$2,500.	
Drawn on Requisitions,	270.000.-	do	57.267.53	
Balance in Washington,	25.000.-		25.232.47	
On hand in Mint,	39.292-			
Total available from date to June 30. 81	$64.292-		$25.232.47	

The Wages Rolls at present amount

to about $33,000- per Month, for 3 Months - $99.000 - or Say, $35.000 more than the Appropriations will justify. The $10.000 - advanced for the present month from the Standard Silver Dollar Appropriation will, with the Ordinary Fund, meet the April Wages, but in order to Continue the present force to the end of the fiscal year, I must be supplied with additional Funds, the deficiency, as you will see being at least $10.000. per month for Wages, for the months of May and June.

In regard to the Contingent Fund, I can only say, that

in view of the necessity that I am under of providing for the Annual Gold Wastage, which at present is an unknown quantity, I shall be obliged to reserve a margin in that Fund sufficient to cover any contingency. The Wastage of Gold, including the Loss on Gold Dust sold last year was some £12,000. If these figures may be taken as a basis, you will see that the balance of the Contingent Fund will be insufficient to meet our wants, being but £13,000 for 2½ months. Under the circumstances, I trust that you will feel clear to furnish me liter

ally with such funds as are at your disposal, for the purpose of continuing the necessary operations of the Institution to the close of the fiscal year.

I have the honor to be,

16th. April 1

Sir:

My attention has been attracted for a long time by the large size of the gas bills rendered necessary by the night work required to execute the orders for silver and gold Coin. I have been anxious to avail myself of the promised improvements in incandescent electric lamps, but until very recently either the imperfection of the apparatus or the legal contentions between rival inventors prevented me from offering any distinct recommendation on the subject.

Having recently learned that the United States Electric Company is

prepared to introduce the Maxim in-
candescent lamps, on fair terms, and
that all adverse patent claims have been
legally terminated, I entered into Corres-
pondence with Mr Schuyler, 120 Broadway,
New York, General Manager of the Compa-
ny, to know on what terms and at what
cost that system could be introduced
into this Mint.

The estimate of the number and
kind of lamps had been previously made
by Mr Maxim, during a visit to this City,
after I had received a favorable report
on the performance of a set of 10 or 12
of the incandescent lamps in the Costume

Room of Prof. G. F. Barker, University of Pennsylvania

The estimate of cost of apparatus and engine is as follows:

Apparatus for 60 incandescent lamps	$1500.00
60 incandescent lamps	120 00
60 switches for " $1.50	90 00
Apparatus @ 10 arc lights	1750.00
Steam engine, 20 horse power	1000.00
Total cost of plant	$4460.00

The cost of running will be as follows.

40 incandescent lamps 10¢ per hour;

to date 15¢ @ 10 arc lights 40¢ p. hour.

say, from 30 to 35 cents per hour when full illumination is required.

The replacing of an incandescent lamp if the old glass globe is returned will cost $1.—. If the incandescent lamp is not run over 20 candle power it is estimated to last many months, a year, if run up to 30 candles, it will last a less time.

If the offer is excepted, Mr Schuyler thinks the apparatus could be set up and put in operation in about 40 days.

The terms which he offers are the following:

"We will place our apparatus in

your premises furnishing all the electrical parts ourselves, use the same for 30 days and at the expiration of that time you shall have the option of keeping the apparatus at the price hereinafter named" (as cited above) "or we will remove the same at our expense" .....
"you would have to furnish the steam power and connections.

I would respectfully request that I be permitted to have the apparatus introduced upon these terms, if on further, I am satisfied with its performance in the Equitable Building, Broadway, New York, where it has been

on trial for several months.

In order to give greater force to these data and suggestions, I have annexed to this communication a table showing the consumption of gas and cost, by quarters during the past four years.

I may further say that the introduction of the incandescent electric lamp into the adjusting room will be of great benefit in lessening the impurity of the air

I have had great trouble in endeavoring to ventilate this room sufficiently and although I have sought

the best Counsel, my efforts have only been moderately successful. During the hours of night work the heat and carbonic acid produced by the numerous gas jets make the air oppressive. But as the incandescent lamps will give out as products of combustion and a very trifling amount of heat, I would expect much benefit from from their introduction and a greater capacity of work from the adjusters

From the form of the proposal, I think that the items for running the lights (day 50 ¢ - 65 ¢ per hour) represent

the cost of the fuel used for generating the steam power, and that this will be comparatively less in an establishment, like this where there is large excess of steam over what is employed in driving the machinery.

As the proposition of the United States Electric Company is so ample and generous as to avoid any possibility of loss to the Merit, I would recommend that permission be granted to have the experiment tried.

If it prove a success, leaving all other considerations out of the question it must be a great source of economy

In reply to your letter of the 13th inst, in regard to the recoinage of minor coins in the Redemption Fund, I have the honor to state, that the old Copper Cents on hand, originally issued at 168 grains each, were redeemed at the rate of 444 pieces to the pound, or say 159 grains each. These could be recoined into Bronze 1¢ pieces of the Current issue, by the addition of 5 % tin and zinc, and yield 3¢ for every Copper Coin so treated, the weight of the Bronze 1¢ piece being 48 grains.

The Copper Nickel Cent of 1856-64

weighing 72 grains, and containing 88% Copper & 12% Nickel, could, by the reduction of 13% Copper, and addition of 13% Nickel, be advantageously recoined into 5 ct. Nickel pieces of the present issue, and yield a profit of 1/3 Cents per day for each piece recoined, or if turned into 3 ct. pieces a profit of 1 ct. per day each.

The Bronze 1 & 2 ct. pieces and Nickel 3 & 5 ct. pieces would of course lose in recoinage into 1, 3 & 5 ct. Coins. The loss is estimated to be about 4%.

The total amount of Minor Coins transferred to the Mint for

3

for Conversion into new Coins was,-

Old Coppers Cents	$ 52.420.88
Nickel One ¢ Coins	283.920.
Bronze One ¢ "	8.210.52
Do Two ¢ "	180.279.72
Nickel Three ¢ "	7.475.—
Do Five ¢ "	20.583.10

Of the above mentioned sum of Old Coppers $ 36.369.26 were run into bars and sold by direction of the Secretary of the Treasury, under date of July 12. 1872, and Director of the Mint July 21st 1874, the quality of the metal being such, that it was deemed inexpedient to use it in the Coinage of 5 ¢ pieces.

With the exception of some 69.628 lbs. Nickel Copper bars, the balance of metal in the charge of the Melter & Refiner is in the form of Ingots, alloyed in part from all the above mentioned Coins, and therefor the amount Consumed cannot be positively stated.

In conclusion I would say, that from the facts above related it is safe to state that the Coins refused to may be recoined without loss.

May 10th 1881

Sir

In reply to your letter of the 7th inst in regard to Charging the Melter & Refiner and Engraver's Rolls for April to the Standard Silver Dollar Appropriation, I have to explain that it was necessary to appropriate the entire $1,000. (if possible) to the payment of wages for that month, and the 3 Rolls charged, viz: 1 Coiner 1 Melter and 1 Engraver's nearly absorbed that amount. Any of the Rolls would have exceeded it, and would most likely, have had to be divided, and the makeup of the Roll destroyed. It is also

Mint of the United States at Philadelphia, Pa.
SUPERINTENDENT'S OFFICE
188

necessary that the Status of the Rolls should be defined early in the month, so that payments made on a/c. of Wages may be charged promptly to the proper a/c, on the day of payment. These 3 Rolls were decided upon to be convenient, and were adopted. Neither the Melter & Refiner's or Engraver's have ever before been paid from the Standard Silver Dollar Appropriation, and 3/4 of Melts prepared last month in the aforesaid Department was Silver. As to the Engraver, he is fully 1/2 his time engaged on Silver Dollar Dies. In my judgment

Mint of the United States at Philadelphia, Pa.

SUPERINTENDENT'S OFFICE

it is not possible to make an accurate division of the time employed in the Coinage of Silver Dollars throughout the year, and it can make no difference what Roll's are charged to the Silver Dollar Fund, so that a fair proportion of the expenses of the Mint are borne by that Fund, when the Institution is engaged in striking that Coin

Sir:

Respectfully referring to your letter (E.O.L.) of 9th inst. calling my attention to an error in the rate charged for one item in voucher #18 and another in #33 Standard Silver Dollar account for April 1881, I have to say that I have made known the errors to the firms from which the supplies were procured

In the case of James W. Vance & Co, they reply that the screws to which reference is made, were purchased and charged on the 3rd. March. The price at that time was 40 per cent

1)

discount: their contract to furnish the Mint with supplies was not signed until the 12th of March; ergo, this order did not come within their bid.

Any statement that Mr Vance may make on this or any other subject may be taken as absolutely true.

In regard to the thread furnished by Staines, he has made a statement to the effect that the thread he agreed to supply was Rawley's, which he could afford to furnish the best of, at $1 75. In transmitting the order for the last 10 lbs. there was a

verbal request made to furnish Coates. She had some difficulty in getting it, and some cost him as high as $2.00 a lb. He therefore put it in at $1.75, but says that as he neglected to state what kind of Cotton he would furnish at $1.75, he is willing to make this less, and throw off the difference between $1.75 being his proposition and the $1.25 charged.

What action shall I take in relation to the thread furnished by Haines. If you think the deduction should be made under the circumstances

shall I have it done on the next supplies furnished

May 18th 1

Sir

I beg to acknowledge the receipt of your letter of the 18th inst, and to refer especially to that part of it in which you state "that as far as "practicable it is desirable, even if "it occasions more trouble, that this "appropriation should pay only such "portion of the expenses as is actually "incurred in connection with the Coin- "age of Silver Dollars."

I desire to respectfully call your attention to the facts set forth in my letter of April 1st ult, in which I endeavored to bring before you the condition I was

in in regard to the Ordinary Wages Funds. I then explained that for the months of April, May & June I should be about 35.000 short on the above fund, & that in order to keep up the force to the end of the present year, I should have to be supplied with the necessary additional funds. In reply to this letter, the Acting Director stated that "any deficiencies "in the regular appropriations for "wages of workmen and Contingent "expenses will be advanced from "time to time during the balance of "this fiscal year from the appropria-

"tion for the Coinage of Standard
"Silver dollars". On the strength
of this assurance, I called for
$20.000 to meet the deficiency in the
wages funds for May, and to liqui-
date the expenses for materials &c.

The Rolls for Wages of Workmen
as the force now stands, and with
the present overtime, amount to
about $32000- (more or less) per
Month. The total sums available
from Ordinary Appropriation is
now but $42.408.59, so that
you can see there is but little
left to continue the force after
May 31st inst unless you provide

me with the means, which will be about $23.000 mm. A division of the Rolls as you have suggested, will not accomplish the result desired, viz: the continuance of the force, and the execution of the work, and I respectfully request that you will reconsider your action, and if you see it to be proper, confirm the authority given in the letter of the acting Director of the 10th ult. and permit me to continue to change the Rolls as heretofore. Please make reply as soon as possible, as the time is approaching when the Rolls will have to be made up, and definite

action on them must be taken.

Sir:

I have the honor to acknowledge the receipt of your letter of 19th inst.

The monthly statement of Silver bullion purchased, commencing Jan.y 1st 1881, requested therein, will be made up and forwarded as early as practicable. The reference to your letter of May 15th. giving special instructions, is not understood, no such letter having been received here (that date falling on Sunday)

In regard to the keeping of a Silver Bullion Purchase account as

as to show the weight and cost value, and the weight, cost and seigniorage on silver coined, I would say that it was not understood that you desired to change the form of accounting at this Mint until after the subject had been carefully looked into, and a decision arrived at, as to the best mode to be adopted; and as nothing has presented itself yet which seems entirely satisfactory and practical, in order to save time the bullion accounts for the 1st quarter, 1881, have been made

up in the usual form, and
bound, and in a few days will
be ready for transmittal to you.

My attention has been called by the Coiner to the condition of the large balance in the Coining room and on careful examination I find that it is in fact quite unreliable.

I would therefore recommend the purchase from Troemner & Co of one similar to that furnished by them to the New York Assay Office, which, with a capacity of 10.000 ounces has a sensibility of .01 oz. The cost is not to exceed $1200 — and as our balance has broken down under the strain of excessive Coinage of Standard Silver dollars, I would respectfully
